PROFESSIONAL SUMMARY

Motivated entry-level AWS Cloud Engineer and 2026 Electronics and Telecommunication Engineering graduate with hands-on experience in AWS cloud computing, cloud infrastructure fundamentals, application development, Python programming, and REST APIs. Experienced in developing serverless applications, integrating databases with Python, and building incident management APIs. Familiar with AWS services including Amazon S3, AWS Lambda, API Gateway, Amazon EC2, IAM and access management, relational and NoSQL databases, Linux, Git, GitHub, and Docker.

TECHNICAL SKILLS

Cloud & AWS: AWS Cloud Computing, AWS Services, Amazon S3, AWS Lambda, Amazon API Gateway, Amazon EC2, AWS IAM, Access Management, Amazon DynamoDB, Amazon Aurora PostgreSQL, Amazon Cognito, Amazon SNS, AWS CLI

Programming & Application Development: Python, JavaScript, Application Development, Flask, REST APIs, JSON

Automation: Python Automation, Boto3

Databases: PostgreSQL, MySQL, Amazon DynamoDB, NoSQL Databases

DevOps & Tools: Linux, Git, GitHub, Docker Fundamentals, VS Code, Postman, AWS Management Console, Application Deployment Fundamentals

Web Technologies: HTML5, CSS3, JavaScript

PROJECT EXPERIENCE

CarbonWise – Carbon Footprint & Electricity Bill Analyzer

Technologies: *Python, AWS Lambda, Amazon S3, API Gateway, Google Gemini API, Amazon Aurora PostgreSQL, Boto3, Psycopg, JSON*

- Developed a serverless application workflow using Amazon S3, API Gateway, and AWS Lambda to process electricity-bill PDF files.
- Integrated Google Gemini API with Python to extract relevant bill details and generate AI-assisted energy insights.
- Implemented electricity-consumption and estimated carbon-emission calculations using a configurable emission factor.
- Implemented database integration using Python and Psycopg to connect AWS Lambda with Amazon Aurora PostgreSQL and store bill and carbon-emission records.

CineBook – AWS Movie Ticket Booking System

Technologies: *HTML5, CSS3, JavaScript, Amazon Cognito, Amazon API Gateway, AWS Lambda, Amazon DynamoDB*

- Developed a web application for browsing movies, selecting showtimes and seats, and reviewing booking details.
- Integrated Amazon Cognito for the configured user authentication flow.
- Created API endpoints for booking tickets, retrieving bookings, and cancelling reservations using API Gateway and Lambda.
- Implemented booking logic to prevent duplicate seat reservations and store booking records in DynamoDB.

CloudOps Rescue Center – Incident Management Platform

Technologies: *HTML5, CSS3, JavaScript, Python, Flask, Flask-CORS, REST APIs, JSON, Docker, Git, GitHub*

- Developed a web-based incident management application using HTML, CSS, and JavaScript to create, view, and track operational incidents.
- Developed Python Flask REST APIs for health checks and incident creation, listing, retrieval, and updates.
- Configured Flask-CORS for frontend-to-backend communication during local development.
- Built a local Docker image for the Flask Incident API as part of application packaging and deployment practice.

EDUCATION

B.E. – Electronics & Telecommunication Engineering — Sinhgad College of Engineering, Pune | 2026 | CGPA: 6.74

HSC — Shri Nath High School, Paithan | 2022 | 78.65%

SSC — Z. P. High School, Paithan | 2020 | 83.44%

TRAINING

AWS & Python Learning — Symbiosis Digital Academy | Project-based training in core AWS services, Python scripting, Boto3, and cloud fundamentals.

CERTIFICATIONS

• Foundation Course on Green Skills and Artificial Intelligence — Edunet Foundation, AICTE & Shell India Markets Pvt. Ltd. | February 2025

• Getting Started with Enterprise Data Science — IBM | April 2024

ACHIEVEMENT

Runner-Up — Final-Year Project Competition for the Autonomous External Wall Painting Robot.
